

My Idea

By: Me

Ballista Slingshot Hybrid

Pros:

- Cheaper than a gauss cannon/railgun
- Easy to assemble/disassemble
- Easy to change/replace parts because its modular
- As easy to aim as an AA gun, has reticule/locking stuff and things.

Cons:

- Relatively slow to reload
- Recoil may play with accuracy
- Things and stuff

Stuff and Things

- Dimensional lumber
- Metal angle things and rods and stuff
- Extension spring

The End
